DETAILED ACTION

The amendment filed March 10, 2003 (Paper No. 19) has been entered. Claims 1 and 2 have been amended.

Claims 1-12 remain pending in the instant application.

Claims 5-12 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention. Applicant timely traversed the restriction requirement in Paper No. 17.

Accordingly, Claims 1-4 are examined herein.

The following rejections are reiterated or newly applied and constitute the complete set of rejections being applied to the instant application. Rejections and objections not reiterated from the previous office action are hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, for reasons of record advanced on pages 3-5 of the Office Action of Paper No. 18 (mailed 12/4/02), because the specification, while being enabling for *in vitro* applications of the claimed method, does not reasonably provide enablement for *in vivo* applications of the claimed method. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

At page 6, paragraph 2 of the response, Applicants assert that the specification provides sufficient description to enable one of skill in the art to practice the claimed invention without undue

Art Unit: 1632

experimentation. In view of the claim amendments, a scope of enablement for *in vitro* applications of the claimed method has been indicated. With regard to *in vivo* applications of the claimed method, it is well established that the specification must provide adequate specific guidance teaching one of skill in the art how to use the claimed method over the full scope. However, the only use for practicing the claimed invention *in vivo* is for therapy and the specification does not provide specific guidance for producing a therapeutic effect when practicing the claimed method *in vivo*.

Thus, the rejection is maintained for reasons of record with regard to the *in vivo* scope of the claims.

Conclusion

No claims are allowed.

This application contains claims 5-12 drawn to an invention nonelected with traverse in Paper No. 17. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
